Goal

Improving my skills in problem-solving, human relations, crisis management, and computer science. Also, playing an active role in the projects and the needed conditions where I work.

About Me

I am currently studying computer engineering, and psychology as a secondary field. I can easily adapt to the environment and team where I work. Also, I always try to use the right communication and solution-oriented thinking to contribute to the work I do. I believe that developers hold incredible power to affect the world. My motivation is the thought of that power and aim of using that for a good cause. I can easily adapt to the environment and team where I work.
